PROFILE

Product Designer with 6 years of experience designing digital products that move business metrics. Since 2020 I have been the sole designer inside backend engineering teams, with end-to-end ownership: I find the opportunity in the data, design the solution, build it alongside engineering and measure the impact. I come from digital marketing and frontend, so I think about business, user and technical feasibility at the same time — and need no translator between the three. I work with AI as an accelerator without giving up judgement: I designed and built an AI-queryable knowledge system with a RAG architecture, end-to-end.

IMPACT

- **Direct-channel conversion nearly doubled** at ILUNION Hotels (~3.36% → ~6.5%, Adobe Analytics), as a contribution within a cross-functional effort.
- **Design systems built from scratch** in three organisations — 47 components audited and documented in the most complete one.
- **WCAG 2.1 AA accessibility** treated as a product standard, not a compliance checkbox.
- **Sustained end-to-end autonomy**: six years with no design layer above me, answering for the outcome rather than the deliverable.

PROFESSIONAL EXPERIENCE

Product Designer — UX/UI & CRO · ILUNION Hotels

Sep 2024 – Present | Travel & eCommerce · Direct channel · 32 properties · Madrid

Sole designer with end-to-end ownership of the highest-revenue digital channel of a 32-hotel chain, embedded in a backend engineering team.

- **Conversion rate optimisation (CRO)**: funnel analysis in Adobe Analytics, behavioural research with heatmaps and session recordings (Microsoft Clarity), A/B hypotheses, iterative design and pre/post measurement.
- UX audits and usability testing to locate friction across the booking funnel; redesign of property pages, services, CTAs and flows.
- Evolution and documentation of the **design system in Figma** (tokens, components, usage rules) across 32 properties and multiple languages.
- UX/UI for acquisition and loyalty campaigns, coordinating an external agency and creative team.
- Work in **AEM** and within the constraints of an external booking engine (Roiback); business reporting in Power BI.
- Cross-functional collaboration with Marketing, Commercial, BI and Engineering to align KPIs and roadmap.
- WCAG 2.1 AA accessibility across all digital touchpoints.

UX/UI Designer — CEF Centro de Estudios Financieros

Jun – Sep 2024 | EdTech · B2B academic platform · Madrid

Defined-scope project on a platform carrying technical debt and no prior design system.

- **Unified design system built from scratch** in Figma.
- **47 components audited, corrected and documented** to full WCAG 2.1 AA conformance.
- 100% keyboard-accessible navigation shipped to production.
- Direct collaboration with developers from requirements through final handoff.

UX/UI Designer — We Are Actions

Jul 2020 – May 2024 | Digital consultancy · B2B & SME · Multi-sector · Madrid

Sole designer within a team of 7 backend engineers. End-to-end responsibility for digital product design across hospitality, automotive and B2B services.

- UX/UI design for web platforms, CRM tools and internal products for concurrent clients across several sectors.
- Design systems from scratch in Figma; prototyping in **HTML5, CSS3 and Bootstrap** integrated with the development team.
- Design Thinking for problem framing; Agile Scrum delivery cycles.
- Stakeholder management in client-facing and multidisciplinary environments.

Graphic Designer (Internship) — AIMPLAS Plastics Technology Centre

2019 | R&D · Institutional communication · Valencia

- Visual identities for R&D projects and communication materials adapted to researchers, investors and the general public.

SELECTED PROJECT

Portfolio as an AI-Queryable Knowledge System · Self-directed

2026 | martamorales.vercel.app | Designed, built and deployed solo

- **Three-layer RAG architecture** (knowledge / system / experience) with a strict separation between what is known, how it is reasoned about and how it is interacted with — a headless base that can feed a website, an MCP server or any future AI interface without being rewritten.
- Bilingual conversational assistant: conversation UX, knowledge base, prompt system, Node serverless backend and integration with two LLM providers (Gemini and Claude) with automatic failover.
- Core design rule: **never invent** — with no documented evidence, the system states its limit. Anti-hallucination as a design decision.

SKILLS

Product & UX: Figma · UX research · information architecture · wireframing & prototyping · interaction design · responsive UI · heuristic analysis · usability · product strategy

CRO & analytics: Adobe Analytics · Microsoft Clarity · Hotjar · A/B testing · funnel & customer journey optimisation · experimentation · Power BI · AEM

Design systems & accessibility: Design tokens · component libraries · documentation & usage rules · WCAG 2.1 AA · keyboard navigation

Applied AI: ChatGPT · Claude · Gemini · Vertex AI · Figma AI · GitHub Copilot · MCP · RAG architecture · prompt & workflow design · LLM API integration · Midjourney · Adobe Firefly

Frontend: HTML5 · CSS3 · Sass · JavaScript · Bootstrap · Node.js · Git/GitHub · Vercel

Ways of working: Agile Scrum · Design Thinking · cross-functional collaboration · stakeholder management · OKRs

EDUCATION

Bootcamp — Digital Product Design & Frontend Development

Neoland · 2024 | UX/UI, product thinking, HTML5, CSS3, Bootstrap, JavaScript, agile methods

Bachelor's Degree in Fine Arts — Graphic, Web and Interface Design

Universitat Politècnica de València · 2016–2020

Master's Degree in Secondary and Vocational Education

Universidad CEU San Pablo · 2022–2023 | Completed alongside a 25h/week design role

LANGUAGES

Spanish — Native | English — Professional (B2)
